Food Technology (XE-G)

Question Number : 122
Correct : 1 Wrong : -0.33

Indicate the correct group that contains a monosaccharide, a disaccharide and a trisaccharide.

(A) Glucose, sucrose, mannose  
(B) Ribose, lactose, raffinose  
(C) Mannose, maltose, lactose  
(D) Raffinose, stachyose, glucose

Question Number : 123
Correct : 1 Wrong : -0.33

In which of the following products, ‘must’ is used as the substrate for fermentation?

(A) Beer  
(B) Wine  
(C) Idli  
(D) Tempeh

Question Number : 124
Correct : 1 Wrong : -0.33

Identify the foodborne illness which is not caused by bacteria.

(A) Botulism  
(B) Listeriosis  
(C) Vibriosis  
(D) Cysticercosis

Question Number : 125
Correct : 1 Wrong : -0.33

Nutrient composition of wheat flour changes with extent of extraction from whole wheat grain. Which of the following statements is true if the extraction rate increased from 50% to 90%?

(A) Starch increases, protein increases, fat increases, mineral increases  
(B) Starch decreases, protein increases, fat increases, mineral increases  
(C) Starch decreases, protein decreases, fat increases, mineral decreases  
(D) Starch decreases, protein increases, fat decreases, mineral decreases

Question Number : 126
Correct : 1 Wrong : 0

You have two samples of milk, one (X) with 3.8% fat and another (Y) with 0.5% fat. In order to produce a milk with 3.5% fat, 100 ml of Y should be mixed with _____ ml of X.
Match the items in column I with the items in column II in relation to food safety and standards.

<table>

(B) P-2, Q-3, R-2, S-1  
(C) P-1, Q-4, R-2, S-3  
(D) P-4, Q-2, R-3, S-1

**Question Number : 128**

Correct : 1  Wrong : 0

A 50% sucrose solution at 20 °C is flowing at a rate of 3.5 m³/h through a pipe with an inside diameter of 0.0475 m and length of 12 m. The viscosity and the density of the solution are 15.43 cp and 1232 kg/m³, respectively. The Reynolds number of the flow is _____.

**Question Number : 129**

Correct : 1  Wrong : 0

In a pineapple juice, fibre particles having mean diameter of 160 μm and density of 1075 kg/m³ are settling by gravity. If the density and viscosity of the juice are 1015 kg/m³ and 0.98 cp, respectively, terminal velocity of the fibre particles is______ mm/s.

**Question Number : 130**

Correct : 1  Wrong : -0.33

Power consumption in liquid mixing is proportional to _______.

(A) Power number × liquid density × (rotational speed)³ × (impeller diameter)⁵  
(B) Power number × liquid density × (rotational speed)² × (impeller diameter)³  
(C) Liquid density × viscosity of the liquid × (rotational speed)² × (impeller diameter)³  
(D) Acceleration due to gravity × liquid density × (rotational speed)³ × (impeller diameter)⁵
Match the following items of group I with the items of group II in relation to the quality of fat.

**Group I**
- P. Saponification number
- Q. Iodine number
- R. Reichert Meissl number
- S. Acetyl value

**Group II**
- 1. Unsaturation of fatty acid
- 2. Volatile water soluble fatty acid
- 3. Hydroxy fatty acid
- 4. Molecular weight of fatty acid

(A) P-1, Q-2, R-3, S-4  (B) P-1, Q-3, R-4, S-2
(C) P-4, Q-1, R-2, S-3  (D) P-2, Q-1, R-3, S-4

---

Match the following metabolic product (Column I) that indicates the quality of food (Column II).

**Column I**
- P. Ethanol
- Q. Lactic acid
- R. Trimethylamine
- S. Volatile fatty acid

**Column II**
- 1. Canned vegetable
- 2. Fish
- 3. Butter
- 4. Apple juice

(A) P-3, Q-2, R-4, S-1  (B) P-4, Q-1, R-2, S-3
(C) P-4, Q-3, R-2, S-1  (D) P-3, Q-4, R-2, S-1
Question Number : 133  Correct : 2  Wrong : -0.66

Correlate the vitamins in column I with their role in promoting reaction/process in column II.

(D) P-4, Q-3, R-2, S-1

Question Number : 134  Correct : 2  Wrong : 0

A pure strain with generation time of 60 min is used in a fermentation process. Following inoculation (0 h), the strain takes 2 h for adaptation, 10 h to achieve maximum growth and 12 h to arrive at the point where the death rate is higher than the growth rate. If the inoculation load is 100 cells, the total population at the end of 10 h will be ______.

Question Number : 135  Correct : 2  Wrong : -0.66

Refer the shear stress – shear rate plot shown in the figure below. Match the lines (Column I) with appropriate rheological behavior (Column II).

<table>
<thead>

(C) P-2, Q-4, R-3, S-1  
(B) P-1, Q-3, R-4, S-2  
(D) P-4, Q-3, R-2, S-1
Question Number : 136

Correct : 2  Wrong : 0

Water flowing at a rate of 1 kg/min is heated from 12 to 80 °C with flue gas supplied at a rate of 3 kg/min. The temperature and specific heat of the flue gas are 180 °C and 1.05 kJ/kg.K, respectively. If specific heat of water is 4.2 kJ/kg.K and the flow is parallel, then the logarithmic mean temperature difference will be _____ °C.

Question Number : 137

Correct : 2  Wrong : 0

The Lineweaver-Burk plot of an enzymatic reaction shows $V_{\text{max}}$ of 160 µmol/l.min and $k_m$ of 60 µmol/l. For a substrate concentration of 40 µmol/l, the velocity of the reaction is estimated to be ____ µmol/l.min.

Question Number : 138

Correct : 2  Wrong : 0

Bread is wrapped in 0.1 mm thick cellophane film having water vapour permeability of $1.82 \times 10^{-10}$ m$^3$ water (STP)/s.m$^2$.atm/m at 38 °C. If the surface area of pack, vapour pressure of water inside and outside of the pack is 0.20 m$^2$, 10 mm Hg and 5 mm Hg, respectively, the loss of water vapour at 38 °C in g/day is _____.

Question Number : 139

Correct : 2  Wrong : -0.66

Match the following methods / system (column I) with the appropriate operations (column II).

<table>
<thead>

(A) P-4, Q-1, R-3, S-6, T-2, U-5  (B) P-4, Q-5, R-2, S-6, T-1, U-3
(C) P-3, Q-5, R-2, S-1, T-3, U-4  (D) P-2, Q-5, R-6, S-3, T-4, U-1
Question Number: 140
Correct: 2 Wrong: 0

A 12 mm thick fish fillet having 80% moisture content (wet basis) is to be frozen using a plate freezer. The plates are maintained at -35 °C. Assume the heat transfer coefficient; initial freezing temperature and latent heat of fusion are 2.0 W/m² K, -2 °C and 330 kJ/kg, respectively. If the density and thermal conductivity of frozen fish fillet are 1050 kg/m³ and 1.48 W/m-K, respectively, the time required to freeze the fillet from the initial freezing temperature is ___ h.

Question Number: 141
Correct: 2 Wrong: 0

A suspension containing $2 \times 10^4$ spores of organism A having a $D_{121.1^\circ C}$ value of 1.5 min and $8 \times 10^5$ spores of organism B having a $D_{121.1^\circ C}$ value of 0.8 min is heated at a constant temperature of 121.1 °C. The heating time needed to obtain a probability of spoilage ‘1 in 1000’ is ______ min.

Question Number: 142
Correct: 2 Wrong: 0

In an evaporation process, a compressor picks up 0.05 m³ air in each revolution and compresses 500 kg of air per minute. If the specific volume of air is 0.9 m³/kg, then the compressor speed is ______ rpm.

Question Number: 143
Correct: 2 Wrong: 0

For a soybean oil extraction system, solvent: soy ratio is maintained at 0.5 : 1 (w/w). Original seed contains 18% oil (w/w). If the meal (soy solid) after final desolventization has 0.01 kg oil per kg oil free meal then, the effectiveness of the solvent (kg oil/ kg solvent) in the extraction process is ________.
Question Number : 165

Which among the following statement(s) is (are) correct.

P: ENSO and El-Nino are the same and refer to the warming of Equatorial Eastern Pacific SST.
Q: ENSO is an atmosphere-ocean coupled phenomenon and El-Nino is its oceanic part.
R: ENSO is an atmospheric phenomenon and El-Nino is an oceanic phenomenon.
S: ENSO is the oscillatory component of El-Nino having a period of 4.7 years.

(A) P & R (B) Only Q (C) P, Q and S (D) R & S

---

Question Number : 166

The event would have been successful if you ____________ able to come.

(A) are (B) had been (C) have been (D) would have been

---

Question Number : 167

There was no doubt that their work was thorough.

Which of the words below is closest in meaning to the underlined word above?

(A) pretty (B) complete (C) sloppy (D) haphazard
Question Number : 168
Correct : 1  Wrong : -0.33

Four cards lie on a table. Each card has a number printed on one side and a colour on the other. The faces visible on the cards are 2, 3, red, and blue.

Proposition: If a card has an even value on one side, then its opposite face is red.

The cards which MUST be turned over to verify the above proposition are

(A) 2, red   (B) 2, 3, red   (C) 2, blue   (D) 2, red, blue

Question Number : 169
Correct : 1  Wrong : -0.33

What is the value of \( x \) when \( 81 \times \left( \frac{16}{25} \right)^{x+2} + \left( \frac{3}{5} \right)^{2x+4} = 144 ? \)

(A) 1   (B) -1   (C) -2   (D) Cannot be determined

Question Number : 170
Correct : 1  Wrong : -0.33

Two dice are thrown simultaneously. The probability that the product of the numbers appearing on the top faces of the dice is a perfect square is

(A) 1/9   (B) 2/9   (C) 1/3   (D) 4/9

Question Number : 171
Correct : 2  Wrong : -0.66

Bhaichung was observing the pattern of people entering and leaving a car service centre. There was a single window where customers were being served. He saw that people inevitably came out of the centre in the order that they went in. However, the time they spent inside seemed to vary a lot; some people came out in a matter of minutes while for others it took much longer.

From this, what can one conclude?

(A) The centre operates on a first-come-first-served basis, but with variable service times, depending on specific customer needs.
(B) Customers were served in an arbitrary order, since they took varying amounts of time for service completion in the centre.
(C) Since some people came out within a few minutes of entering the centre, the system is likely to operate on a last-come-first-served basis.
(D) Entering the centre early ensured that one would have shorter service times and most people attempted to do this.
Question Number : 172
Correct : 2 Wrong : -0.66

A map shows the elevations of Darjeeling, Gangtok, Kalimpong, Pelling, and Siliguri.
Kalimpong is at a lower elevation than Gangtok. Pelling is at a lower elevation than Gangtok.
Pelling is at a higher elevation than Siliguri. Darjeeling is at a higher elevation than Gangtok.

Which of the following statements can be inferred from the paragraph above?

i. Pelling is at a higher elevation than Kalimpong
ii. Kalimpong is at a lower elevation than Darjeeling
iii. Kalimpong is at a higher elevation than Siliguri
iv. Siliguri is at a lower elevation than Gangtok

(A) Only ii  (B) Only ii and iii  (C) Only ii and iv  (D) Only iii and iv

Question Number : 173
Correct : 2 Wrong : -0.66

P, Q, R, S, T and U are seated around a circular table. R is seated two places to the right of Q. P is seated three places to the left of R. S is seated opposite U. If P and U now switch seats, which of the following must necessarily be true?

(A) P is immediately to the right of R
(B) T is immediately to the left of P
(C) T is immediately to the left of P or P is immediately to the right of Q
(D) U is immediately to the right of R or P is immediately to the left of T

Question Number : 174
Correct : 2 Wrong : -0.66

Budhan covers a distance of 19 km in 2 hours by cycling one fourth of the time and walking the rest. The next day he cycles (at the same speed as before) for half the time and walks the rest (at the same speed as before) and covers 26 km in 2 hours. The speed in km/h at which Budhan walks is

(A) 1  (B) 4  (C) 5  (D) 6
The points in the graph below represent the halts of a lift for durations of 1 minute, over a period of 1 hour.

Which of the following statements are correct?

i. The elevator never moves directly from any non-ground floor to another non-ground floor over the one hour period

ii. The elevator stays on the fourth floor for the longest duration over the one hour period

(A) Only i  (B) Only ii  (C) Both i and ii  (D) Neither i nor ii
